Relay needs multi support

I have one of the devs as a close friend who is always patient and helps me when I am confused or have issues.

Can we please make the relay not spam me with out of range messages. i am rlv scripter and have actually thought about blocking the oc relay in all future devices.

Make it mandatory for designers, builders who sell for example collars that they are COPY MOD, if they use OpenCollar scripts in their product. Impossible to update NO MOD products.

i would love finer control of auths. also, i miss the Terminal function. it was simple and fast "presets" could be stored in a notecard and pasted into terminal quickly. can't wait for the return of cuffs. and for the wish list, i really liked the old grid-wide remote control function so a user could reach out and touch me! someday maybe?

I would really love the option for the wearer of the collar to be able to add a 'guest' to
